**BRAKE & CLUTCH ITEMS**

THE EARLY SPEC. C-TYPES WERE FITTED WITH THE LATE XK120 SELF-ADJUSTING 12" DRUM BRAKES

SOME OF THESE VEHICLES WERE LATER MODIFIED TO XK150 'DUNLOP DISK BRAKE SPEC.

LATE C & D-TYPES USED A UNIQUE 6 ROUND PAD CARRIER ASSEMBLIES TO THE FRONT DISC AND 4 PAD CARRIER ASSEMBLIES TO THE REARS.

Wherever possible we keep new genuine O.E. spec manufacturers parts in preference to pattern, or recon.

*All brake lines conform to British Standard BS2871, Part 2, CN102 specification*
